Electrical Engineering undergraduate at the University of Indonesia with a strong interest in power systems, electrical equipment, and data-driven problem solving. Experienced in leading teams, managing technical projects, and collaborating in diverse environments through academic and organizational activities.

Possessing strong analytical, teamwork, and project management skills, with hands-on experience in engineering projects, research initiatives, and technology development. Eager to expand practical knowledge in the electrical industry, contribute to impactful projects, and continuously develop both technical and professional capabilities.

Education Level

Universitas Indonesia - Depok, Indonesia <i>Undergraduate of Electrical Engineering, 3.71/4.00</i>	Aug 2024 - Aug 2028 (Expected)
--	--------------------------------

Organisational Experience

Ikatan Mahasiswa Elektro Fakultas Teknik Universitas Indonesia - Indonesia <i>Vice Head of Research and Development (R&D)</i> - Led Research & Development staff in conducting organizational analysis and evaluation across multiple divisions. - Developed data-driven recommendations and strategic assessments to support executive decision-making. - Managed research initiatives and consulting activities that generated actionable insights for organizational improvement.	Feb 2026 - Present
Robotics Team - MAN 2 Jakarta, Indonesia <i>Head of MAN 2 Jakarta's Robotics Team</i> - Revitalized the school's robotics team after a one year inactivity period by recruiting mentors, rebuilding team operations, and establishing structured training programs. - Led the design, development, and testing of robotics projects for competitive events. - Managed team coordination, project planning, and technical preparation to ensure competition readiness. - Guided the team to achieve multiple awards, including 3rd Place in a competition category at ASEAN Robotic Day and 2nd & 3rd Place in some robotics competition categories at Jakarta Madrasah Competition. - Developed a sustainable team structure to support continuous participation and achievement in robotics competitions.	Aug 2022 - Aug 2023

Other Experience

Elektro Charity by IME FTUI 2025 - Bogor, Indonesia <i>Vice Head of Publication, Design, and Documentation</i> An engineering-based community service program organized by IME FTUI, where students collaborate to develop and implement technological solutions for local communities. The 2025 project delivered a solar-powered lighting system to address public lighting issues in a rural area. - Led and supervised 3 divisions such as publication, design, and documentation throughout the event lifecycle. - Managed the production of creative promotional content, including videos and social media designs. - Coordinated task delegation and monitored deliverables to ensure effective team execution. - Oversaw event documentation and media management during on-site activities. - Ensured consistent branding and communication across all publication materials.	Jul 2025 - Oct 2025
--	---------------------

Skills & Achievements

- Favorable Idea at Innovation Idea Competition by PT Pertamina Hulu Energi** (2025): Worked as part of a research and innovation team developing a Microbial Fuel Cell project that generates electricity while bioremediating heavy metals from post-mining drilling mud waste. Contributed to research development, data analysis, and technical presentations, while strengthening skills in teamwork, problem solving, data-driven analysis, and scientific innovation.
- Professional Skills:** Leadership, Project Management, Strategic Analysis, Stakeholder Management, Problem Solving, Communication, Slide Decking
- Technical Skills:** Arduino, Proteus, Microsoft Excel
- Design & Productivity:** Adobe Photoshop, Adobe Premiere Pro, Figma, Google Workspace
